

VISTAR KALA

Frontend Product Requirements Document (PRD)

1. Product Overview

Vistar Kala is an AI-powered digital marketplace for artisans, weavers, and micro-entrepreneurs. The application helps artisans digitize products, create professional listings, get AI-assisted fair pricing, showcase authenticity, sell products directly, and participate in buyer requirements and bidding.

The frontend should be simple, visually clean, multilingual-friendly, and easy to use for users with low digital literacy.

2. User Roles

Artisan

- Add products
- Enhance product images
- Generate product descriptions using voice/AI
- View fair price recommendations
- Manage products
- Participate in buyer reverse bids
- Create auctions/bids
- Manage orders

Buyer

- Browse products
- Search and filter
- View authenticity
- Place bids
- Post requirements for reverse bidding
- Compare artisan bids
- Place orders

3. Navigation

Artisan: Home | My Products | Add Product | Bids | Profile

Buyer: Home | Explore | Requirements | Orders | Profile

4. Login & Onboarding

Welcome: Vistar Kala — Bringing traditional craftsmanship to the digital marketplace.

Actions: Continue as Artisan / Continue as Buyer

Login: Mobile number + OTP. Include language selection with English, Hindi, and regional language options.

5. Artisan Home Dashboard

- Greeting
- Quick actions: Add Product, AI Price Check, View Bids, Buyer Requirements

- Dashboard cards: Total Products, Active Listings, Active Bids, Orders, Earnings
- Relevant buyer requirements with View & Bid action

6. Add Product

Step 1 — Product Image

Take Photo / Upload Photo. AI Image Studio removes the background, improves lighting, enhances the image, and formats it for e-commerce.

Actions: Use Image / Retake

Step 2 — Product Information

Basic details: Product Name, Category, Material, Craft Type, Origin, Quantity, Dimensions/Size.

Description input: Describe by Voice or Type Description. AI generates product title, short description, detailed description, features, and keywords. Allow the artisan to edit the generated content.

7. Product Authentication

Display an Authenticity & Certification section:

- Artisan Verified
- Product Origin
- GI Status
- Handloom Mark
- Relevant Certification
- Craft Technique

Statuses should be: Verified, Not Verified, or Not Applicable. Do not claim government verification unless actual verification data exists.

8. Dynamic Fair Price

Purpose: Help artisans determine a fair and competitive selling price.

Factors: Material Cost, Artisans Involved, Labour Hours, Production Time, Craftsmanship, Authenticity/Certification, Current Market Price, Market Demand, Additional Costs.

Result: AI Recommended Fair Price, Suggested Price Range, Estimated Production Cost, Estimated Profit.

Example: Production Cost ■1,700 | Market Range ■2,000–■2,500 | Recommended Fair Price ■2,299 | Estimated Profit ■599.

Include a 'Why this price?' explanation and allow the artisan to use or manually edit the recommended price.

9. Product Preview & Product Details

Product Card

- Product image
- Product name
- Price
- Craft/category
- Material
- Origin
- Artisan/seller

- Authenticity/GI status
- Short description
- Quantity

Product Details

- Large product images
- Product name and price
- Artisan
- Origin
- Material
- Craft
- Quantity
- Description
- Production time
- Authenticity
- Certifications
- Customization

Actions: Buy Now / Bid / Contact Artisan

10. Normal Bidding

The artisan lists a product and buyers bid for it.

Artisan inputs: Product, Base Price, Minimum Bid Increment, Bidding Start Time, Bidding End Time, Quantity, Preparation/Delivery Time.

Active auction: Current Highest Bid, Number of Bids, Time Remaining.

11. Reverse Bidding

The buyer posts a requirement and interested artisans submit their price, delivery time, and proposal.

Buyer Requirement

- Product Required
- Quantity
- Customization
- Budget (optional)
- Required By
- Delivery Location
- Additional Requirements
- Reference Image (optional)

Example: 100 Custom Cotton Bags | Quantity: 100 | Customization: Company logo + blue colour | Required by: 20 Sept | Delivery: Hyderabad | Budget: ₹20,000

Action: Post Requirement

Artisan Reverse Bid

- Bid Price

- Quantity I Can Fulfil
- Completion/Delivery Time
- Customization Capability
- Short Proposal
- Previous Work/Sample (optional)

Action: Submit Bid

Buyer Bid Comparison

Show Artisan, Price, Delivery, Rating, and Verification status. Actions: View Profile / View Work / Chat / Select Artisan.

The buyer should not be forced to select only the lowest price.

12. AI Artisan Matching

For reverse bidding, AI can recommend artisans based on craft expertise, product type, customization capability, quantity capacity, delivery deadline, location, previous work, rating, and price.

Example: Best Match — Artisan A | 96% Match | Can fulfil quantity | Required expertise | Can meet deadline | Customization available.

13. My Products

Product cards should show image, product name, price, stock, and status. Statuses: Published, Draft, Under Review, Sold. Actions: Edit / View / Unpublish.

14. Bids Dashboard

Artisan: My Auctions | Buyer Requirements | My Reverse Bids | Won Bids

Buyer: My Bids | My Requirements | Received Offers | Won Auctions

15. Orders

Display Order ID, Product, Artisan/Buyer, Amount, and Status.

Order flow: Confirmed → In Production → Ready → Shipped → Delivered

16. Profile

Artisan Profile

- Profile photo
- Artisan name
- Craft
- Location
- Years of experience
- Products
- Certifications
- Authenticity status
- Ratings/reviews
- Completed orders

Buyer Profile

- Name/company
- Location
- Orders
- Active requirements
- Bidding history

17. Search & Discovery

Search by Product, Craft, Material, Location, or Artisan.

Filters: Price range, Craft type, Authenticity verified, GI products, Handmade, Availability, Customization.

18. UI/UX Requirements

- Minimal interface
- Large buttons
- Clear icons
- Short text
- High readability
- Consistent cards
- Clear CTAs
- Minimal form fields
- Voice input wherever possible
- Regional language support
- Large touch targets
- Simple error messages
- Avoid technical jargon

19. Priority Prototype Screens

Artisan: Login, Home, Add Product, AI Image Studio, AI Auto-Catalogue, Dynamic Fair Price, Product Authentication, Product Preview, My Products, Bidding, Reverse Bidding Requirements, Profile.

Buyer: Home, Product Discovery, Product Details, Product Authentication, Normal Bidding, Post Requirement, Reverse Bid Comparison, Orders.

20. Primary Prototype Demo Flow

Artisan flow: Login → Add Product → Take/Upload Photo → AI Enhancement → Voice Description → AI Catalogue → Fair Price → Authentication → Publish → Buyer Views → Buyer Bids.

Reverse bidding flow: Buyer Posts Requirement → Artisans Receive Requirement → Artisans Submit Bids → Buyer Compares → Buyer Selects Artisan → Order Confirmed.

21. Core Value Proposition

For Artisans: Create → Price → Authenticate → Sell

For Buyers: Discover → Verify → Bid → Buy

Product statement: Vistar Kala transforms traditional craftsmanship into a digital business by connecting artisans directly with buyers through AI-powered cataloguing, fair pricing, authentication, and two-way bidding.
